

Network-Based Erasure

When processing a variety of assets is a must, our flagship Enterprise Data Erasure Software, XEraser can be deployed via network (PXE) to Laptops, Desktops and Servers using our LServer software. LServer controls DHCP and TFTP so you don't need to worry about setting up separate software to control your erasure environment. This all-in-one deployment tool can be set up with a click of a button so you are up and running in minutes.

Product Highlights

- ✓ Automatic asset audit data collection
- ✓ Full suite of diagnostics including
 - CPU
 - Battery Health
 - WiFi
 - Keyboard
 - Memory
 - Battery Drain
 - Display
 - Pointers/Buttons
 - USB Ports
 - HDD/SSD/NVMe
 - Touchscreen
- ✓ Cosmetic Grading (both custom and R2V3) can be performed and recorded to better assess the condition and value of the Chromebook for re-sale or re-use.
- ✓ EPS' price-scraping technology gets the high, low, and average pricing from Ebay and Newegg to determine the most up to date re-sale value of your Chromebooks.
- ✓ Completely customizable comprehensive reports and labels can be automatically generated and printed for each asset.

Additional Information

- ✓ Cloud-based licensing for easy deployment anywhere, anytime.
- ✓ Licenses come with unlimited technical support and updates as well as FREE Configuration and Web-Based Training.
- ✓ Cloud-based reporting and data analytics are available via our XCloud portal for an additional cost.
- ✓ All asset specs and diagnostic results can easily be uploaded into any database or ERP solution.
